PROFESSIONAL SUMMARY

Innovative Full Stack MERN Developer and technical trainer with expertise in building scalable web architectures, SaaS platforms, and CMS solutions. Proven ability to architect complex state management systems and mentor the next generation of software engineers through practical, real-world coding supervision. Adept at handling end-to-end project lifecycles, from custom React applications to robust e-commerce deployments.

PROFESSIONAL EXPERIENCE

Technical Trainer & Code Supervisor

Present

CoDev Technologies

- Supervise and mentor students in basic and advanced web development, ensuring strict adherence to code quality and industry best practices.
- Guide junior developers through hands-on, project-based training, effectively bridging the gap between theoretical programming concepts and professional MERN stack implementation.

Operations Manager & Instructor

2026 - Present

Seeraht Skills Development Program

- Direct program operations, student enrollments, and scheduling for intensive technical summer camps and ongoing educational sessions.
- Design technical curriculum and instruct students in modern frontend and backend technologies to prepare them for competitive freelance and full-time market opportunities.

Freelance Web & E-Commerce Developer

2024 - Present

Independent Consultant

- Develop, customize, and deploy optimized e-commerce platforms using WordPress, WooCommerce, and Shopify for international clients across US and Canadian markets.
- Integrate advanced dropshipping fulfillment workflows (AliExpress, DSers) and customize themes to ensure high-converting, mobile-responsive storefronts.

TECHNICAL PROJECTS

Seeraht LMS

[In Development](#)

- Architecting a highly scalable Learning Management System utilizing **React, Node.js, Express, and MongoDB**.
- Focusing on secure authentication flows, robust RESTful API data layers, and seamless media handling via Cloudinary.

Restaurant Management Platform

[Live Demo](#)

- Developed a full-stack MERN application tailored for fast-food businesses in Pakistan.
- Optimized dynamic menu management and order processing with integrated Cloudinary asset handling for fast load times.

Seeraht Educational Ecosystem

[Live Demo](#)

- Engineered the official digital infrastructure for an educational organization to efficiently handle school systems, e-commerce book sales, and course registrations.

TECHNICAL EXPERTISE

Frontend: React, JavaScript (ES6+), Tailwind CSS, Ant Design (antd), Framer Motion, HTML5/CSS3.

Backend & Databases: Node.js, Express.js, MongoDB, RESTful APIs, Cloudinary.

E-Commerce: WordPress, WooCommerce, Shopify, Dropshipping Integrations (DSers).

Tools & Leadership: Git/GitHub, Vite, Technical Mentorship, Code Supervision.
